

DV-404 Reinforcement Profile Screwing Machine

REINFORCEMENT SCREW DRIVER MACHINES » DV-404

- For single profile processing.
- Automatic screwing of the reinforcement profile by means of foot pedal switch.
- Adjustable according to different profile cross sections.
- Automatic screw feed.
- Automatic depth stop system independent from profile height.
- Standard equipped with profile support conveyors left and right.
- Pneumatic clamping during processing.

Technical Features :

• Max. Profile Section Dimensions: 110 mm x 80 mm	• Machine Height : 2150 mm
• Min. Profile Width: 40 mm	• Machine Length: 400 mm (3910 mm included conveyors)
• Air Pressure: 6-8 bar	• Machine Width: 750 mm
• Air Consumption: 200 l/min.	• Machine Weight: 105 kg
