

KC-258 – 40 Heritage Double Head Welding Machine

Welds two corners of PVC profiles with a single operation

Controlled fusion limitation for double side HTL welding

Fixed left head allows welding at variable angles (60°-180°)

Movable head is locked in position by pneumatic braking

Welds white profiles as well as coloured profiles (0.2 mm welding seam restriction)

All operations can be controlled automatically

Two hand safety operation

Fully guarded

Ability to clean the heater plates easily

Special setting plate for double side HTL welding

Special heater plate for double side HTL welding

Turret stop positioning for heater plate and setting plate for double side HTL welding

Technical Features:	
Power Supply: 410 V, 3 ~ 50-60 Hz	Min. Profile Height: 38 mm
Total Power: 3 kW	Max. Profile Width: 130 mm (90° Welding)
Air Consumption: 100 l/dk	Machinery Height: 1640 mm
Air Pressure: 6-8 bar	Machinery Length: 3840 mm
Max. Welding Length: 3400 mm	Machinery Width: 760 mm
Min. Welding Length: 460 mm	Machinery Weight: 550 kg
Max. Profile Height: 190 mm
