SMR-5

Multi Head Welding Machine

- PC controlled (PID) heat control system to sustain strong welding results in compliance with international standards.
- Rigid linear guideway systems to restrict the stretching and gaps.
- Heating temperature, melting and welding times can be adjusted individually for every profile type.
- Profile selecting system with revolver for 8 different sizes.
- Multi head welding system which can work independently from each other.
- Each head can be controlled separately for transom or 90° welding.
- Welding moulds can be changed easily and fast.
- Foldable and height adjustable profile support system.
- Ability to weld PVC profiles in "H" and "T" shape at 90°.
